Before You Get Started

Welcome to the Impetus LSAT Logic Games Review Method. This method has helped many of our students see dramatic increases in their logic games scores in a short period of time. Before diving into this step-by-step approach, please read the key points below:

1. Make sure you understand the fundamentals—This review method will work regardless of what curriculum or prep company you use, but make sure you understand the basics in terms of the opening passage, the rules, the diagrams, and the various game types. If you would like to sign up for the Impetus LSAT logic games course to learn these fundamentals, sign up [here](#).
2. Have with you a book or online resource that can provide explanations for each game you attempt. These can often be found online for free through Google.
3. While this method should be used when reviewing logic games timed sections, make sure to first utilize this process on individual games. We recommend focusing on one game type at a time. For example, rather than doing random games, it is more effective to start off with practicing only sequencing/ordering games before moving on to grouping, and so on. Also, it is better to do the games in order of difficulty, starting with the easiest games.
4. Take all the time you need. It is okay if you took a very a long time to complete a game. And it is natural to take a long time to complete the review process (in fact, it is expected). Taking your time will help you truly engage with the game and you should see a gradual increase in speed overtime. For this reason, **start off practicing the games UNTIMED**. After you have fully mastered 3-6 games using the process outlined in the Untimed Process, you can move on to practicing games of that type using the Timed Process.
 - a. Even during the Timed Process, **you are not rushing**. You are focusing on gaining speed even though you are taking your time.

Untimed Process

Timed Process

Be aware of your timed goals (for your first attempt). Here are recommended estimates of what time constraints you should shoot for based on your target score. The difficulty of the game needs to be factored into your timed goals.

	Easy	Medium	Hard
10-13 Correct	8-10 min	9-11 min	10-13 min
15-18 Correct	7-8 min	8-10 min	9-11 min
Perfect Score	4-6 min	5-8 min	7-10 min

1. Attempt a new game, timing with a stopwatch (do not set a time limit. Just see how long it takes you)
2. Reattempt the game, utilizing the Untimed Process (Page 3)
3. Complete steps 1 and 2 for 3-4 games
4. The next day, repeat the games again. If you can complete the game within the target time frame, move on to another set of games and repeat the timed process. If not, repeat steps 1-4 for the same set of games.
